WELCOME

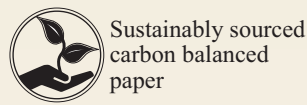

Our 2025 catalogue has an ever-increasing focus on renewable, recyclable and sustainable products.

In collaboration with our suppliers we are making huge strides to a more sustainable way of working. Over the past few years there has been a massive improvement in production methods to create materials with eco credentials, to manufacture products made using corn starch or sugar cane, products that are 100% biodegradable and are referred to as Bioplastics. Or they are made using sustainable, recycled or partially recycled material. New for 2025 we have introduced a range of carbon neutral Ocean Bottles, which use recycled stainless steel and ocean bound plastics.

These processes are being constantly refined. As the number of such processes is increasing all the time, we've highlighted some of our most widely used.

GENERAL TERMS

This catalogue has been printed and bound in the UK. We have used sustainably sourced, carbon balanced paper. Carbon balanced paper is a simple way for us to reduce the carbon impacts of our paper and printing, reducing our carbon footprint and impacts on climate change. Carbon Balancing is delivered in partnership with World Land Trust, an international conservation charity, through the protection and restoration of threatened forests in the tropics.

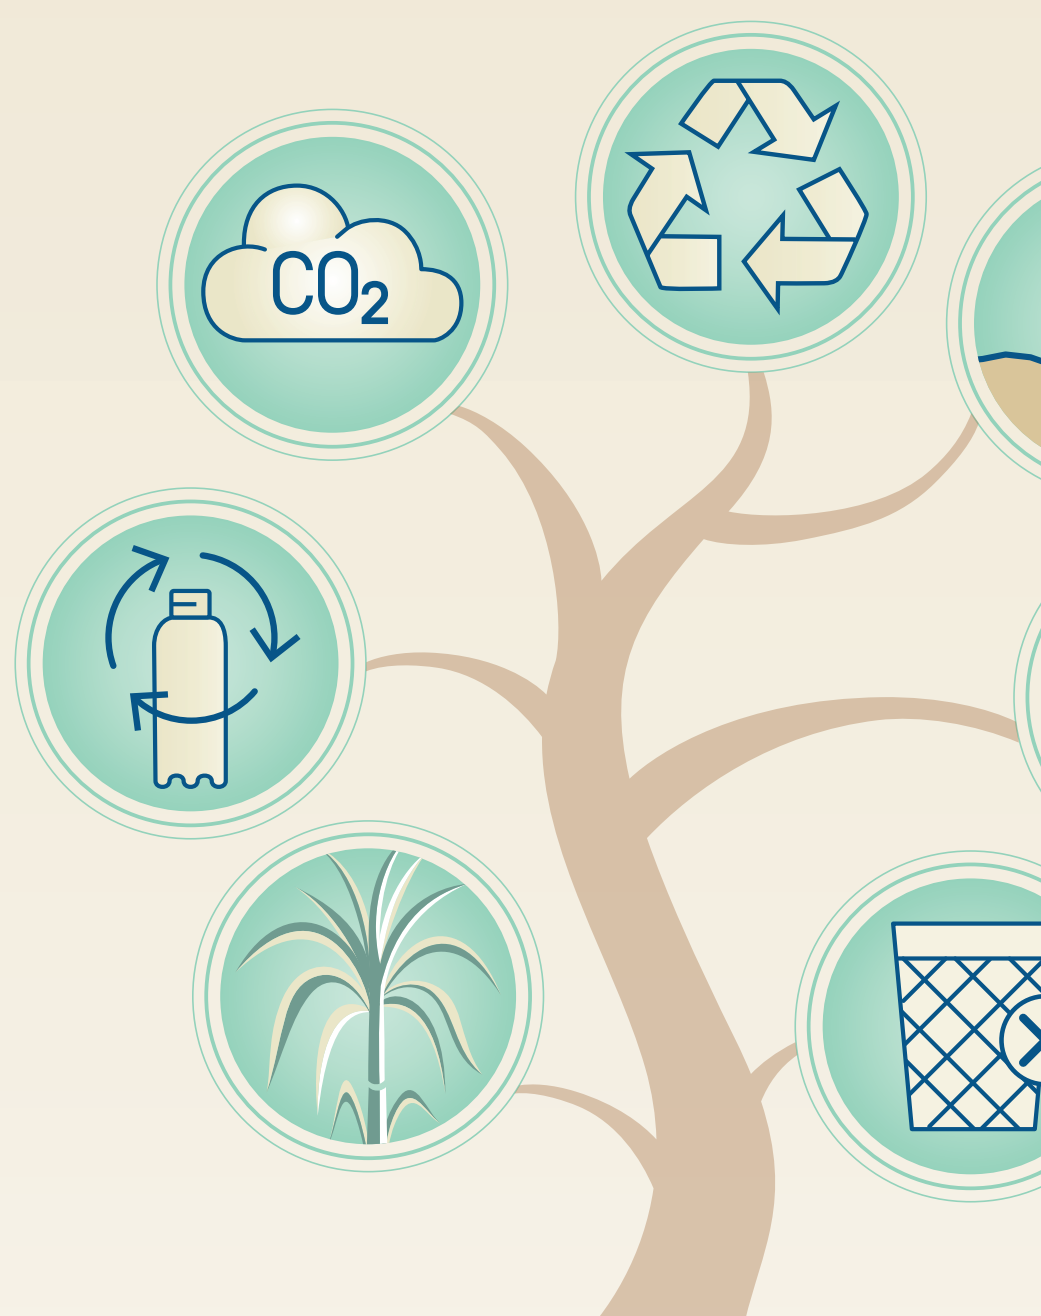

Some of our products are imported and even our UK manufactured products are subject to extreme volatility in currency and freight prices. It is vital you check prices before placing any orders. Origination is the set up charge for printing, embroidery or engraving and will vary depending on product and how many colours are required. Please ask for a detailed quotation.

All prices shown in the catalogue are exclusive of carriage and VAT unless otherwise stated. The products shown in this publication, names or trademarks DO NOT imply that these products have been supplied to, or endorsed by the owners of these said names or trademarks. They are used merely to show the effect of personalisation of the item shown. It is not our intention to cause any offence to the owners of said names or logo and we apologise for any inconvenience that this may cause. We reserve the right to alter any details or design of products illustrated without further notice. We reserve the right of retention of title of all goods supplied until paid for in full in line with our payment terms. We shall be deemed to have completed an order upon delivery of +/- 5% of the quantity ordered. Although every effort has been made to reproduce accurately the colours of the items illustrated. It is not possible to guarantee perfect colour reproduction due to limitations of the printing process.

KEY

- Shorter lead times available
- Full colour digital printing is available
- Product manufactured in the UK
- Made from recycled material
- Made from recycled plastic bottles
- Made from wheat straw
- Made from bamboo or sugar cane
- Made from renewable material
- Made from wood
- Made from paper or cardboard
- Biodegradable
- Carbon neutral
- Made from cotton

Ocean Bottle

Each Ocean Bottle is entirely carbon neutral and collects 1,000 plastic bottles to improve livelihoods in coastal communities. The bottle contains recycled stainless steel and recycled ocean-bound plastic and is NFC Smart Chip enabled to collect more plastic with every refill.

Foamo

Foamo is the smarter solution to single-use coffee cups. Made from a plant based material with 70% renewable material, waste vegetable oil that would normally go to landfill. Designed to minimise its carbon impact while being easy to reuse time and again. Up to 50% less plastic than existing twin wall coffee cups. It is top shelf dishwasher safe and at the end of its life is recyclable in your household recycling.

Dopper

Dopper exists to solve the problems caused by packaged water, and the damage it does to our world's waters. In short, we are here to end packaged water.

All Dopper bottles and accessories are made from 85% recycled material and are Cradle to Cradle Certified® Bronze or higher, with the Gold certified Dopper Original being the most sustainable reusable bottle in the world.

CHILI

As part of our dedication to the environment, Chili Concept has been carbon neutral since 2018. By implementing energy-efficient practices, supporting renewable energy sources and reforestation, carbon emissions are offsetted to help create a cleaner and greener world. We understand that even small steps can make a big difference. That's why we actively choose eco-friendly materials and responsible practices to reduce our environmental footprint. Small steps matter, and we're committed to taking them in the right direction.

como

porto

RECYCLED

High quality stitched gifts made from recycled bottles (rPET) with an exceptional deboss quality. Both ranges have exceptional eco credentials. The Como range has a subtle grained finish and is soft and tactile in 8 colours. The Porto range has a smooth finish and is soft and tactile in 10 colours. Over 70% of the range is made in the UK including notebooks and hand sanitiser pouches. Reach compliant and vegan friendly.

AWARE

THE TRUE STORY OF SUSTAINABLE FABRICS

Impact Aware products are made with AWARE™ tracer. Recycled materials requiring almost zero water in production. AWARE™ applies tracer particles to the raw recycled cotton and then uses blockchain to guarantee the material that enters the supply chain is the same that comes out as apparel. By offering validation, transparency and verification, this can work to eliminate greenwashing and establish more trust in the textiles industry.

PREVENTED OCEAN PLASTIC

Prevented Ocean Plastic is made from recycled plastic PET bottles (rPET) and produced according to European and North American quality standards.

Prevented Ocean Plastic is categorised as being found within 50km (30mi) of an ocean coastline or major waterway that feeds into the ocean. The countries it is collected from lack waste management infrastructure and collection incentives and have infrastructure that is being overwhelmed by population growth or tourism.

THE LOOP BOTTLE

The Loop bottle is made out of rHDPE (Recycled High Density Polyethylene) from milk bottles. It is manufactured in a closed loop, zero waste environment in the UK, reinforcing the eco credential of this best selling drinkware collection and reducing the carbon footprint.

The manufacturing process is zero waste, all waste gets turned into new product. Bottles are made in the UK, lowering the carbon footprint, and are made with 100% renewable energy in our UK factory.

R+ (formerly rHIPS)

R+ is 100% recycled and biodegradable. R+ products are produced from waste material from the manufacturing process (of which we're exclusively using recycled WEEE material) as well as all the waste generated from our print process being also recycled. Both these streams of materials are blended to create R+, a unique recycled plastic. By reusing our own waste, and recycled materials being recycled again, our objective of lowering the carbon footprint of our products is achievable.

25308 BIO 500ML GRIP BOTTLE

GUIDE PRICE
£2.91
50 PCS

The Bio bottle is recyclable. It is special because unlike other plastics it breaks down much faster if it ends up in landfill or the ocean. Once disposed of, in a few years it becomes food for microbes leaving behind no microplastics, just natural remnant.

140 x 89mm

25309 FOAMO SUSTAINABLE INSULATED COFFEE CUP

Introducing Foamo, the smarter solution to single-use coffee cups. Made from a plant based material with 70% renewable material, waste vegetable oil that would normally go to landfill, Foamo is redefining reusable coffee cups to give your coffee game a glow-up while supporting a cleaner, greener planet. Foamo has been designed to minimise its carbon impact while being easy to re-use time and time again. The cup uses up to 50% less plastic than existing twin wall coffee cups. It is top shelf dishwasher safe and at the end of its life is recyclable in your household recycling.

47 x 47mm

A British manufacturer's initiative supporting environmental projects from the sale of factory waste materials, the reuse or recycling of key parts from our British made products and the promotion of changing to more sustainable natural materials. We aim to plant over 20,000 trees and offset over 1000 tonnes of carbon. No loss in quality, no additional cost to you, no increased lead times, just environmental benefits from informed decision making.

A circular economy model of manufacturing

We will offset over 1000 tonnes of CO₂ in 2024

We will plant over 20,000 trees in 2024

We can reduce waste, reuse items, recycle more

Unique plastic free packaging system
